

# November 2024: Release notes

08/11/2025 7:17 pm EDT

## Communicate

Click Usage information has been removed from automated and one-time campaigns dashboards.

## Other feature releases

### User management

- Client Admin-level users are able to [change the sign-in method for each user as needed](#), between authenticating with a Bluecore username and password or through their existing company SSO.
- The [user management list page](#), for both single-namespace and multi-namespace accounts, has been visually updated.

### Catalog

- A product's view history, add to cart history, and purchase history have been moved to a separate "Product History" section.
  - The `version` and `bc_is_valid` fields have been removed.
-
