

Create an SFTP import integration

01/30/2026 1:24 pm EST

Bluecore supports two integrations you can use to [import files on a recurring schedule](#): The Bluecore SFTP and the custom import integration.

- Bluecore SFTP
 - Integrates directly with your Files.com folder
 - Automatically populates authentication details.
- Custom import integration
 - Connects to any SFTP server that uses a username and password.

User Role	View	Edit
Client Admin	Yes	Yes
Data Manager	Yes	Yes
Viewer	Yes	No

Prerequisites

- If you are creating a custom import integration:
 - An SFTP account that Bluecore can access to retrieve files.
 - Service credentials (username and password) to the SFTP account that Bluecore can use to access the SFTP server.

Create a Bluecore SFTP integration

1. Navigate to ☐ **Data Management > Integrations**.
2. Click **New Integration > Bluecore Integration Marketplace**.
3. Search for **Imports Bluecore SFTP** and click **New Integration**.
4. Complete the required fields then click **Save**.

Create a custom import integration

1. Navigate to ☐ **Data Management > Integrations**.
 2. Click **New Integration > Custom Import Integration**.
 3. Enter a name into the **Integration Label** field and click **Continue**.
 4. Complete the sections then click **Save**.
