Create an SFTP import integration

08/28/2025 6:13 pm EDT

> ⚠ This article describes a new feature which is currently in early access and not available for general use at this time. This will be available in a future release.
>
> If you are interested in being an early access client, reach out to your Customer Success Manager.

User Role	View	Edit
Client Admin	Yes	Yes
Data Manager	Yes	Yes
Viewer	Yes	No

Bluecore can connect to any SFTP that uses either a username and password or SSH keys authentication.

You can connect to any compatible SFTP server, such as Files.com or Google Cloud Storage (GCS), to import files on a recurring schedule.

Prerequisites

- An SFTP account that Bluecore can access to retrieve files.
- One of the following types of credentials that allow Bluecore to access the SFTP server programmatically:
  - Service-level credentials (username and password) to the SFTP account
  - SSH private key
    - SSH keys can be entered in the **Password** field.

Create an SFTP import integration

1. Navigate to [ ] **Data** > **Integrations**. The Integrations list appears.

2. Click **New Integration** > **Custom Import Integration**. The Integration Settings dialog box appears.

3. Enter a name into the **Integration Label** field and click **Continue**.

4. Complete the sections and, when finished, click **Save**. The integration is saved.
