Set adjustable send times

01/28/2026 3:17 pm EST

You can create more restrictive send times for SMS/MMS campaigns by adjusting hours for each day of the week.

Bluecore does not extend sent times past 8 AM-9 PM local time daily, because of the Telephone Consumer Protection Act (TCPA) national default window. The time is based on the customer's area code.

Campaigns pull in send time restrictions at launch. Changes to send times do not affect campaigns that are currently launching.

For more information on how Bluecore handles quiet hours and send times, seeSMS/MMS Settings send times.

Adjust send times by days of the week

1. Go to ☐ **Campaigns** > **Settings** > **SMS/MMS Settings** > **Send Times**.

2. On the day you want to adjust hours, move the selector on the linear bar.

3. When finished, click Save.

Prevent sends on specific days of the week

1. Go to ☐ **Campaigns** > **Settings** > **SMS/MMS Settings** > **Send Times**.

2. Clear the checkbox for any day you don't want the message to send.

3. When finished, click **Save**.
